Mediasite: Activation Sent

A confirmation email will be sent to the email address associated with your account shortly. Follow that link at any time to complete your Mediasite profile.

3.

You can create or upload videos via the button 'Add Media'.

You can choose to place an existing video in your environment or make desktop recordings.

To place an existing video you can use the button 'I want to upload a file from my computer'. Then proceed to step 4.

If you want to make a desktop recording, for example a PowerPoint presentation with recorded image and sound via the built-in camera and microphone, you need to use the 'Mediasite Desktop Recorder'.

If you have an UvA laptop, the Mediasite Desktop Recorder can be found in the software catalog under the name UvA-Clipmaker.

If you have a personal or self-support PC, you can download the recorder software via the following link:

Start the now installed program 'Desktop Recorder 2'

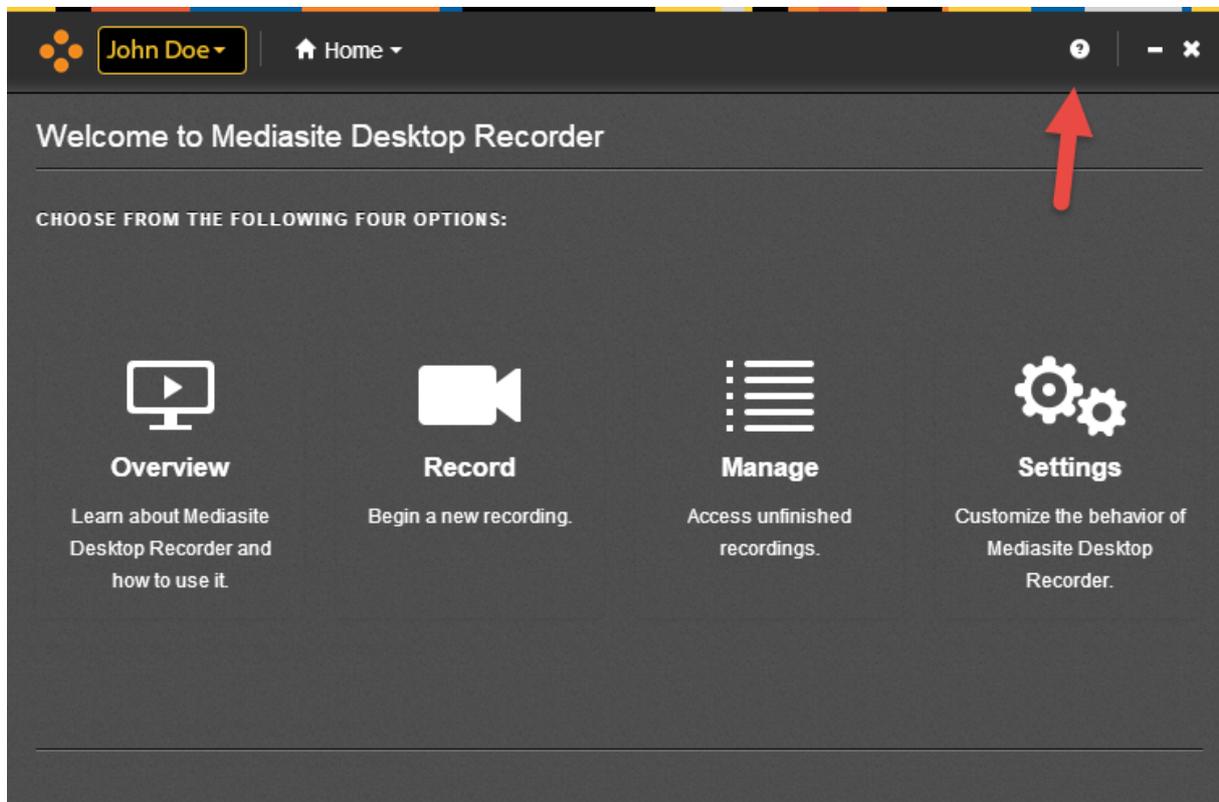

After the installation it is important you register the recorder. This can be done with the 'Confirm & Register' button (step 3) on the page where you also go to download the software.

If you use an UvA laptop you must also register via the link:

<https://webcolleges.uva.nl/mediasite/mymediasite/desktop-recorder/download> (step 3.)

At the top left, you will see your name appear.

Further explanation of the recorder can be found under the 'Help' button.

When you have made a recording, it is automatically placed in your personal environment after pressing the 'Finish' button.

4.

The file upload takes a couple of minutes, depending on the length of the recording and the upload bandwidth. If you try to upload a long recording with a small bandwidth at home this can even take tens of minutes.

When the file has arrived within the 'MyMediasite' environment, it must still be transcoded by the server in a streamable format. This again can take some time, depending on how busy the platform is.

During or after this process you can enter the description, tags and any external links of the presentation using the 'Edit Details' button.
